## SUMMARY

Dynamic Full Stack Developer building scalable web applications with modern frameworks. Experienced in delivering high-performance solutions and optimizing user experience across diverse client projects.

## EXPERIENCE

### Full Stack Developer

**Freelancer**

April 2025 – Present

- Engineered end-to-end web applications for diverse clients, integrating modern frameworks and tools to streamline functionality and enhance user experience.
- Devised and deployed RESTful APIs using Node.js and Express for over 15 client projects, reducing integration time by 30% and supporting scalable, secure two-way data flow between frontend interfaces and backend databases.
- Optimized application performance by implementing caching strategies and database query improvements, cutting average page load time by **40%** and boosting overall client satisfaction ratings.

### Mobile Application Developer

**Globatech Group**

July 2024 – August 2025

- Engineered and deployed cross-platform mobile applications for Globatech Group, ensuring seamless user experiences and integrating third-party APIs to expand core functionalities.
- Improved app performance and stability by optimizing state management and API handling, reducing crash rates by **35%** and increasing overall user retention.
- Built **20+ reusable components** using modular architecture, accelerating feature development cycles by **40%** and reducing code duplication by **30%**.
- Demonstrated professional competencies by directing a 6-month initiative to upskill a team of 8 developers through targeted workshops and code reviews, increasing feature delivery velocity by 25% and elevating code quality based on SonarQube metrics.

### IT Manager

**Bareeq Education & Development**

August 2023 – March 2025

- Managed end-to-end IT operations for **50+ company systems and devices**, overseeing network infrastructure, software, and hardware maintenance while leading a **team of 6+ IT professionals**.
- Aligned technology initiatives with business goals by delivering **10+ strategic IT projects**, improving system efficiency by **30%** and strengthening security compliance across all departments.
- Implemented IT security protocols and system upgrades that reduced downtime by **40%**, improved data protection standards, and increased overall operational efficiency.

### Principal Analyst

**DeVO Protocol**

April 2024 – January 2025

- Managed end-to-end IT operations for **50+ systems and devices**, overseeing network infrastructure, software, and hardware maintenance while leading a **team of 6+ IT professionals**.
- Delivered **10+ strategic IT initiatives** aligned with business objectives, improving system efficiency by **30%** and strengthening security compliance across all departments.
- Implemented IT security protocols and infrastructure upgrades, reducing downtime by **40%**, enhancing data protection standards, and boosting overall operational efficiency.

## EDUCATION

### B.S. degree in Software Engineering

Israa University • Amman • 2019-2023 • Excellent

## SKILLS

Web Development, Mobile Development, Problem Solving, Project Management

Algorithms and Data Structure, Python, Artificial Intelligence and ML

Arabic, English
